IN WRITING PROCESS

“The fluttering of the Islamic state theory” (*in Arabic, in writing process*)

A book criticizes the Islamic State Theory IST.

The IST is the basic idea, proposal, goal, and motivator of political Islam, and the fundamental extreme Islamism since the beginning of the 20th century. many books were written to criticize the concept, either by denying the righteous of the idea itself, or by trying to modernize it to fit to the modern state. However, the Islamism stream and the concept of IST got to be stronger by time because of many reasons, one of them is the failure of Arab and Muslim intellectuals who are against the Islamist stream.

One reason why the books and efforts, which criticize the Islamic state concept, didn't succeed in defeating the Islamism stream ideologies is the methodologies used. therefore, the Islamists could argue and sometimes confute them. The main two problems of these books are:

- 1- they go into detailed discussions about the Islamic scripts (Quran, hadith, and Fiqh), where it can endless debate, and any idea can be proved or confuted. The Islamic scripts, and the interpretations are like supermarket, one can find anything for any purpose.
- 2- Most of the intellectual products in this field use high complicated language and address the academic specialists, therefore they have been often far from people and mainly the youth.

I try in my book, and my writings, to avoid these two weak points, depending on a rational objective discussion, and simple language.

The book will include:

- 1- definitions of state, modern state, and state systems, in addition to definition of religion, Islam and Sharia, regarding the historical periods.
- 2- The IST before year 1900:
 - In Quran and Hadith
 - In Islamic heritage
 - The interpretations of Islamic scholars before 1900
- 3- Was it Islamic state or a state of Muslims from the time of the prophet Mohamad until Ottoman state?
- 4- Confuting the modern proposals of IST,
 - by Muslim brothers and their school
 - by Salafism and Wahabism
 - by Khomeini school
 - by moderate Islamic scholars
- 5- The modern state basics
 - The democracy
 - The secularism

The human right values

- 6- The clash between the IST and the modern state concepts
- 7- The conspiracy theory and the IST
- 8- The crisis of the Western democracy and system, what to learn

“The struggle of Conspiracy theories” *(in Arabic, in writing process)*
